

Call to Action *Reconnective Healing® Practitioners*

We are all aware there are many changes that have been and continue to occur in our lives, communities, the world and the Planet itself. . Increased levels of intensity seem to be developing relative to conditions we are experiencing through weather changes, issues with governments, financial institutions and, in many cases, our inability to look at the bigger picture. There are implications of far-reaching disturbances on all levels.

As stated in the “Keyes of Enoch”, Key 317, “a malillumination field fell upon this planet”. Yet, there is hope and a multiplicity of possibilities for a favorable outcome. The shift, in a way, will occur according to the level of balance or imbalance that exists on this planet. We all have a role to play in the outcome.

We are in partnership with Mother Earth and all that lives within and upon her. This biosphere is a co-evolutionary habitat, a trapped consciousness environment where we have reached a plateau; a state we are here to transcend for continued evolvment. All life, each species individually and collectively play a part in this evolutionary process. Ultimately, the outcome is dependent on the choices we human beings make on this plane in existence. Balance is progress, it is a process; it is inevitable; and will come one way or the other. The result will be harmony.

Those of us who embody the seeds of Truth, know that in order to support peace, balance, healing and harmony for ourselves, our communities and the Earth including all life within and upon her, a shift must occur. A sense of urgency and purpose is at hand but we must maintain our mastery within Reconnective Healing philosophy for this call to action without directing or attachment to outcome. When we are engaging in the healing equation (the practitioner and God/Love/ Universe), we are the facilitators not the “doers” or the “deciders”.

Opportunities come our way each and every day to make a positive impact in the world whether through our healing practice or simply by being present. In our everyday activities, it is as simple as putting our attention on the frequencies in any situation or anywhere life takes you. Our attention allows the light and information to expand thereby reaching out to others who may not otherwise come in contact with these frequencies for healing and evolution. Do not judge or measure any situation or condition. Issue out the loving presence within your heart which is “central to this process”. Act on what is best for all. Our actions (and non-actions) matter. The Universe supports and empowers our action with what is appropriate to unfold for the highest good and in proper formation.

The motivating factor is BE PRESENT, put your attention on and become aware of the frequencies. ALLOW without filtering or directing. Know you are in service in some way without the need to know what it is. Examine the relationship you share with others on this planet; this would include all life – people, animals, plants, and minerals. Implement the partnership consciousness.

You must know that you are a Master. Continue doing what you are doing. What you are doing is bringing Light and Information to the Planet. Those that you connect and interact with will also.

“You Are Essential!!!” (100th Monkey page 144)
